Pain

Explore Goal Identify Baseline Examine Process Improve Leadership Monitor & Sustain Celebrate

Now that you know what you want to improve, it's important to identify your starting point or baseline. Download the data tracking tool and collect data for a month or so to determine your starting point.

Pain Management Tracking Tool

Use this Excel workbook to track your residents' pain, the timing and type of assessments, and the kind of interventions they receive. The tool will produce charts to help you identify patterns and track processes during the month and summary statistics that will allow you to track your outcomes and progress over time.
