

Data from 23 nursing home residents was collected by research assistants. Residents were asked to indicate daily preferences for 57 activities using the stem "Do you like....." and the likert type scale " 0-not at all or no pref, 1=a little or somewhat, 2- a lot". In addition they were asked "How well do you feel this preference has been satisfied in the last 2 weeks?" using the following likert-type scale " 0=not at all, 1=a little or somewhat satisfied, 2= mostly or completely satisfied".

Subject number	101	103	104
subjects ranged in age from 52-102			
Mean years of education was 12.17.	12	15	12
Sample was 61% women.	1	1	1
MMSE score ranged from 14-30, X= 24.95	27	25	25
Data was collected between 7/15/2009- 9/2/2009	7/15/2009	7/15/2009	7/15/2009

Average number of "Likes a lot" items per resident was 29 (out of 57) (range 12-51)
